Infrared Lamps Human Use

PAR38 IR 150W E27 230V Red 1CT/12

Signify offers two infrared lamp types for use in heat radiating devices for human applications These Philips infrared lamps have a wavelength spectrum with a pronounced peak at approximately 1000 nm in the deep-penetrating IR-A range. IR-A range has a greater penetrating power, which means that the heat is dissipated in a larger skin volume thus creating a more pleasant and diffuse warmth. Philips infrared lamps for human applications are designed to support relaxation of the muscular tension. These lamps can be used to provide warmth to the human skin, muscles and joints.

Warnings and Safety

- When used correctly, lamp breaking is very unlikely. If a lamp breaks, carefully remove the parts (with gloves or protective tools to avoid skin cuts). Put the parts in a sealable plastic bag and take it to your local waste facilities for recycling. Do not use a vacuum cleaner.
- Follow recommended time and distance of exposure of the device with which this lamp is used. Longer / closer than recommended exposure to infrared heat may cause skin burn or other undesirable skin-protective reactions.
- Follow device instructions for eye and skin safety and protection. Do not direct the lamp into eyes, always protect eyes, including as recommended by manufacturer of device.
